

RICOMET 2015

Risk perception, communication and ethics of exposures to ionising radiation

CLOSING SESSION

Marie-Pierre BIGOT

Ilma CHOFFEL DE WITTE

RICOMET 2015

Risk perception, communication and ethics of exposures to ionising radiation

What have we learned from the process over these three days

- The overall impression from the participants is that the small group sessions gave more opportunities for debate.
- Most probably next time in the plenary sessions more time for discussion after each presentation

RICOMET 2015

Risk perception, communication and ethics of exposures to ionising radiation

WHAT DO WE THINK ARE THE KEY CHALLENGES TO TAKE FORWARD

- Increase collaboration between Technical Sciences and Social Sciences to favor Public outreach (Interdisciplinary approach)

RICOMET 2015

Risk perception, communication and ethics of exposures to ionising radiation

WHAT DO WE THINK ARE THE KEY CHALLENGES TO TAKE FORWARD

- Knowledge based society requires Citizens Involvement at large scale: Local communities, teachers, students, mothers, volunteers depending on their respective needs
- More Citizen Engagement and empowerment by for example creating opportunities to monitor Radioactivity with the help of scientists (SAFECAST)

RICOMET 2015

Risk perception, communication and ethics of exposures to ionising radiation

Thank you for the fruitful exchanges and
hopefully till next time!
