Komu najbolj zaupa javnost?

- communication of IR is often meant to persuade the people that everything is fine
- one way communication vs listening and accepting other views

- communicate realistically
- admit the risks and / or danger and present it realistically
- mercury in energy saving light bulbs and in your teeth

- promptly and regularly informing about the accidents

- not only educated people can make decisions
- not everyone must understand IR
- expert's role is to objectively inform people and help them make decisions
- people must be consulted
